

Flush fascia full height washroom cubicles with integral basins installed by Decra for this office refurbishment near London's Leadenhall Market.

Architect; Buckley Gray Yeoman specified the Decra Burj cubicle system for this prestigious office at 15-18 Lime Street London. Burj is usually supplied with partitions in laminate supplied by Decra but on this occasion we supplied our fascia onto jumbo stud partitions. Doors and pilasters comprise of a lightweight core faced with walnut veneer and finished with a/c lacquer and the duct panels within the cubicles are clad with walnut veneer with melamine overlay for better protection against moisture ingress. This clever use of materials enabled the main contractor Blenheim House to meet tight cost constraints. Burj forms part of the Decra Architectura collection of innovative washroom cubicles and associated products from Decra - a cubicle company rapidly becoming the standard bearer in the washroom industry for full height cubicles.
