## Visitor Centre, Beefeater Gin - Decra Burj cubicles

Design consultants Four By Two specified the Decra Burj full height flush fascia cubicle system for the visitor centre at Beefeater Gin's distillery in the shadow of the Oval cricket ground in London.

38mm lightweight doors and pilasters sport an eye catching high pressure laminate from Italian manufacturer "Arpa" called **Black Pixel** - the texture suggesting multiple tones in a single colour laminate. Ash hardwood edges have been rebated and stained to complement the fascia.

White laminate faced partitions are combined with vivid red laminate faced rear ducts providing a strong visual connection to the Beefeater Gin brand.

Extruded aluminium forms the interface between floor and ceiling and Burj incorporates good quality s/steel hardware including German designed DDA compliant locks, buffered coat hooks and sprung hinges.

For more details of the Burj cubicle system contact our sales department.

Decra Burj full height flush fascia cubicles - Beefeater Gin Visitor Centre - fascia in Arpa Back Pixel laminate.
