

Above mortised lift off hinges- right- standard Stratum sprung s/s hinge

Decra Stratum Burj washroom cubicle concept as installed at the Plaza Liverpool office complex for Bruntwood Property services. 38 mm fascia comprising of real wood veneer laminate bonded onto a composite of 2 sheets of lightweight mdf bonded together and rebated hardwood edge-stained to match face veneer. This installation uses walnut veneer encapsulated with melamine for durability. We can provide options for the hinge- either a sprung stainless steel fall to close hinge (surface mounted) or a Royde & Tucker lift off Hi-Load hinge (mortised into the rebate). Partition panel can be either supported with a 20mm or 100mm stainless steel foot- or we can offer true full height by using the extruded aluminium sections as shown above- that effectively clad the partition at floor and ceiling levels and an infill strip in either matching laminate or stainless steel is applied to the sections which effectively, hide all the fixing screws. Partition panel can be secured to the wall and pilasters using Decra invis fixings as an alternative to cleats or channel sections. An innovative solution from Decra washrooms.....ends
