

Decra Burj full height cubicle system installed at Vodafone's new National Call Centre in Stoke On Trent !!!

Architect RPS Architecture in Birmingham together with contractor Morgan Ashurst chose the Decra Burj cubicle system for this call centre hub for Vodafone. 38mm lightweight core doors and pilasters are faced with real wood maple veneer with a melamine overlay and a rebated matching hardwood edge provides a contemporary flush fascia appearance. To work to tight budget constraints Decra provided a laminate version of the real wood fascia veneer for the cubicle duct panels. Burj forms part of the Architectura collection of innovative cubicles and vanity units.
