Burj 38mm flush fascia cubicles

Architects Magyer Marsoni chose the Decra Burj 38mm full height flush fascia cubicle concept as a more cost effective solution to the originally specified 44mm joinery solution. 38mm lightweight core panels are faced with plain grey high pressure laminate from Polyrey's Papago collection. Discreet rebated hardwood edge provides the linear appearance and a new German designed stainless steel lock concept (DDA compliant) for the door furniture. Glossy white laminated particleboard is used for the cubicle interior providing a real contemporary mix of textures. True full height with extruded sections encapsulating the partition panels and an infill strip hides all fixing screws.
