

Cannon Bridge House- Cannon Street- London, Decra Burj 38 mm full height flush fascia cubicle system and Corian vanity unit

# “The moody loos”

Decra's full height cubicle system with red toughened glass wall panels

Main contractor Overbury proposed the Decra Burj 38mm flush fascia cubicle system as a better value for money solution to the specified cubicle system. Lightweight mdf fascia panels are faced with plain grey laminate from Decra's standard colour range. Partitions are supported at the floor with 45mm extruded aluminium section and at the ceiling level using a discreet head rail. Quality stainless steel lock (DDA compliant) keeps the quality of the construction consistent and the duct panel design provides a feature within the cubicle compartment. Glacier white Corian vanity unit in a slab form echoes the contemporary theme. Burj represents value for money without design compromise !!!!
