

Natural History Museum unveils their latest exhibit - stunning washroom cubicles by Decra Ltd.

Architects Berman Guedes Stretton specified this flush fascia cubicle system from Decra. Burj is normally a full height cubicle system based on a lightweight 38mm core - faced, in this instance, with real wood veneer laminate in Zebrano wood effect from the Alpi range of reconstituted veneers with a wax overlay.

Cubicles are secured at the floor using aluminum interface sections with inlays of matching Zebrano and a head rail supports the structure at the top.

The cubicles achieve the freestanding look sought by the architect. Quality DDA compliant stainless steel locks and hinges complete this quality installation.

Burj forms part of the Decra Architectura collection of innovative washroom cubicles and associated products - call Decra for a full brochure pack.

Should you wish to view these eye catching cubicles, the museum opens from 10 am every day.
