

Fact file

25 North Row, London, Decra **Chicane VFH** toilet cubicles

Specialist fit out contractor Paragon Management specified the Decra flush fascia **Chicane** cubicle system in a virtual full height configuration for this office fit out near London's Hyde Park.

38mm lightweight doors and pilasters are faced with Abet 608 Grainwood high pressure laminate and rebated polished ash hardwood edges and the 19mm laminate faced partitions are in a plain white finish with the woodgrain laminate for the rear duct panels.

Normally, **Chicane VFH** has a 100mm stainless steel pedestal but for this client we continued the partition panel to the floor and applied an extruded aluminium Interface to the base of the partitions to avoid any water ingress when cleaning.

Chicane VFH incorporates good quality German designed DDA compliant s/steel locks, s/steel sprung hinges and buffered s/steel coat hooks.

Vanity units have Duravit china basins fixed onto Hi-Macs solid surfacing faced moisture resistant substrate for a contemporary appearance.

Decra are both FSC and PEFC accredited and can provide appropriate specifications to meet any BREEAM considerations.
