

Fact file

Patriot Court - Slough Decra Chicane VFH with floor interface

London based property managers and architects - Jones Lang Lasalle specified the Decra flush-fascia Chicane cubicle system in a virtual full height configuration for this office complex of a major online retailer.

The 38mm fascia features white hpl faced doors with ash effect wood-grain pilasters and over panels. All doors and pilasters have rebated ash hardwood edges. The white partitions, vanity under-panels and ducts with their ash laminate flash-gaps carry the composition through the whole layout.

As with all Decra's VFH cubicles, Chicane retains a nominal ceiling gap to cut cost while, in this instance, the partitions are secured at floor level with a specially designed interface instead of using the usual 100mm foot.

As standard, Chicane offers DDA compliant locks, buffered coat hooks, sprung hinges and cleat fixings - all in stainless steel - and is available in heights from 2100mm. True Full Height Burj cubicles are also available.

The vanity top is Decra Slabb fabricated in 'Glacier White' Corian with semi-recessed china basins.

Decra are **chain of custody certified** and can advise on Chicane specifications.
