## Trinity St. Stephen's first school Eton Decra **Loo-ART**

Local architects CSK liaised closely with Decra to provide this innovative cubicle installation at Trinity St Stephen's school in the Borough of Windsor & Eton.

Decra's Loo-ART service offers clients the opportunity to enhance their cubicles by including attractive images on doors, ducts and wall panels.

Your chosen image becomes the decorative top layer of a sheet of High Pressure Laminate from Formica - the size of which gives the highest possible number of Loo-ART panels ensuring we can maximise our yield and minimise your cost.

CSK chose the images from a collection of royalty free digital images held on file at Decra and, judging by the feedback from architect and teachers alike, the new cubicles have proved to be a real success with the children.

Playful mirrors are combined with colourful non-slip flooring and toilet seats to complete this modern, friendly washroom project.

For more details of the Decra Loo-ART range of children's and adults' cubicles, please contact our sales department on 020 8520 4371
