

Fact file

Pharmaceutical company Hoddesdon.

Main contractor the Austin company designed these eye catching washrooms for a new building for a well known pharmaceutical company in Hertfordshire.

Decra Executive was chosen as a low cost solution in these almost florescent colours from the Abet Laminati collection of Italian high pressure laminates.

Panels are 19mm overall with the laminate bonded onto moisture resistant core boards and DDA compliant satin anodised aluminium hardware contrasts well with the bold plain colours.

Vanity units have post formed laminate tops and laminate under panels.

Contact Decra for more details.
