

Decra Freestyle **VFH** - Kingdown School - Wiltshire

Wiltshire Council's education service specified the Decra virtual full height version of our durable cubicle system "Freestyle" for some new toilet blocks at Kingdown School.

13mm solid grade (compact) laminate has been used for all panels in a simple two - tone black and grey colour scheme to comply with the Building Regs Part M recommendations that doors and pilasters should have a sufficient colour contrast in respect of light reflectance.

Pilasters and partitions are supported at the floor with anodised aluminium sections and the overall height of the cubicles is 2540mm (to ensure minimal wastage from the laminate sheet). The fascia is secured with a continuous aluminium headrail and the pilaster mounted saa locks are DDA compliant.

Contact Decra for more details on **020 8520 4371** or visit us at www.toiletcubicles.org
