

Fact file

Hollymount Primary School - Raynes Park Decra **Freestyle** cubicles

Architects Haverstock Associates specified the Decra **Freestyle** cubicle system for Hollymount Primary School in South West London.

Durable 12mm solid grade laminate is standard with **Freestyle** and the vibrant multi colour scheme and contemporary lighting and stark concrete ceiling has culminated in a stunning combination of components.

Freestyle is the ideal choice for school washrooms in being both cost competitive and as the images show, numerous colour combinations are available. Cubicle have been configured in various height to suit the different age groups of the pupils.

Decra also provided slatted benches with a sturdy frame and beech real wood top and again the architects have created a strong visual effect with the wall paint finish, strips of bare concrete and the narrow aperture windows.

Decra chain of custody accredited and can provide a fully PEFC compliant specification for the **Freestyle** system for BREEAM considerations.

Contact the Decra sales department for more information.

Freestyle cubicles with low height doors in multi colours from the Abet Laminati colour range

Focus on Education case study **11**
