

Decra Reflex L locker system as installed at 50 Old Bailey London-- offices for Dyer Associates architects

Single tier and 2 tier combination in red and grey

Assa locks as standard

## “Lock up in the Old Bailey”

Architects— Denton Associates chose the Decra Reflex L laminate locker system for new offices for their client Candover in London’s Old Bailey. 20mm thick doors comprising of laminate bonded onto particleboard and edged in the same laminate are combined with 19mm melamine faced chipboard carcass to provide an **inexpensive** but extremely flexible locker solution. As the structure is made to order we can achieve various lay outs to suit the area. We like the use of the 2 colours here to give a contemporary appearance and to break up the monotony of using just a single colour. Contact the sales dept for details.

Shower room with solid surface vanity unit
