

Decra's Reflex Z configuration locker system used for staff changing rooms at the newly refurbished Kensington Jurys Hotel.

Architect HKR specified the Decra Reflex Z locker system as part of a major overhaul of this well respected hotel in Queen Annes Gate, South Kensington. Lockers have an overall height of 1960mm from ffl and the Z configuration makes it easier to hang garments such as business suits etc. Doors are constructed from laminate bonded onto a particleboard core in a 2 tone colour system from Decra's laminate colour ranges. Integral solid grade laminate bench units are provided with a rounded edge for comfort and the lockers have quality ASSA locking mechanism. For more details contact the Decra sales department
