

Levada trough vanity unit

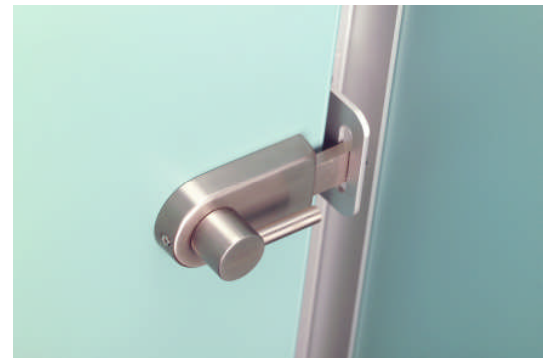

Crawley county shopping mall– Decra Luna cubicle concept and Levada vanity unit

Faceted urinal duct panelling

# Decra's Luna landing in Crawley.....

Architects Crane Associates chose the Decra Luna cubicle system and Levada trough vanity unit for this contemporary washroom solution in Crawley. Luna features glass look acrylic doors in 12mm that visually look like toughened glass but without the safety implications, mounted onto extended height aluminium pilasters and have DDA compliant stainless steel locks. Levada trough is manufactured from solid surface material (e.g. Corian) which as a repairable surface represents good whole life value. For more details contact the Decra sales department

DDA compliant stainless steel lock
