

Fact file

**"Moody Loos"** Napoleons Casino - Leicester SQ - Decra Stratum CDF

The facilities manager at London's Napoleons Casino chose the Decra Stratum CDF cubicle range for a washroom fit-out at their Leicester Square Casino.

KRONOSWISS compact density fibreboard (CDF) is a new product from Switzerland which provides a high quality multi layered panel that we have faced, in this instance, with high pressure laminate.

CDF devolves many of the benefits of 20mm solid grade or "compact" laminate, but allows us to offer a far greater range of colours, made available by the use of thin décor laminates.

Doors and pilasters have rebated edges to facilitate a contemporary flush fascia and the ironmongery is DDA compliant stainless steel.

For more details of the Decra Stratum CDF cubicle system contact our sales department.

Focus on Leisure  
Decra Stratum CDF
