

Torquay Community College - BSF Pathfinder school

Decra's solution for unisex BSF projects - Stratum FH

Working closely with contractor Interserve and project architect Kensington Taylor, Decra washrooms created this elegant flush fascia cubicle idea using the company's respected Stratum range of linear fronted cubicles.

Durable 20mm solid grade laminate is used for the doors and pilasters and 13mm solid grade laminate for the partition/duct panels. Extruded aluminium sections act as interfaces for the floor and ceiling junctions to provide **a true full height solution**. Stratum FH is one of a number of full height a ranges for BSF - contact Decra for details.
