

Fact file

Aspers Casino - Westfield Stratford Decra **Stratum** cubicles

Specialist leisure design experts Design Coalition chose the durable Decra stratum flush fascia cubicle system for Aspers Casino - part of the Westfield Stratford shopping complex in East London.

This eye catching scheme features 20mm solid grade laminate in a gold metallic colour for the cubicle doors and pilasters and 12mm solid grade laminate in the same colour for the partition panels.

Quality DDA compliant s/steel lock assembly, ambulant disabled cubicle pull handles and sprung stainless steel hinges maintain the metallic appearance.

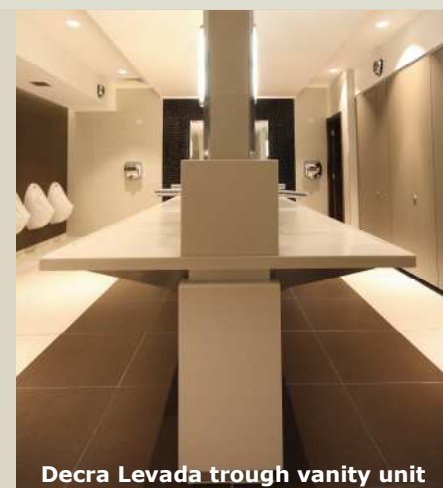

Design coalition wanted a virtual full height solution and Decra were able to provide a 20mm satin stainless steel pedestal to gently elevate the partition from the floor whilst still working to the design brief and the fascia has a nominal gap from the ceiling using a continuous satin anodised aluminium head rail.

Vanity units take the form of Decra's Levada trough range using Corian solid surfacing for an eye catching minimalist look.

Decra are chain of custody certified and can provide a fully PEFC compliant specification for the Stratum system to meet any BREEAM project requirements.
