

Friary shopping mall– washroom area ground floor

Stratum 20mm cubicles and 13mm solid grade laminate urinal duct panels

Friary Shopping Mall– Guildford Decra Stratum 20mm flush fascia cubicle system in plain grey

## Westfield teams up with Decra Ltd on the Guildford Friary new washroom areas

We recently re visited this project after 18 months or so usage. The only evidence of any damage was some graffiti which was removed with ease with the recommended cleaning agents. The facility manager is delighted with the performance of the Stratum cubicles and the owner Westfield have subsequently proposed Decra for a number of imminent upgrades and new build including White City. Stratum 20mm uses durable 20mm solid grade laminate with the door and pilasters rebated to create a linear frontage and 13mm solid grade laminate for the division and duct panels. Stainless steel hardware includes DDA compliant lock, 100mm foot and sprung stainless steel hinges

Urinal duct panels

Granite vanity top
