

Decra puts the gloss black into Queen Mary University loos !!!!

Innovative toilet cubicle fabricators Decra Ltd worked closely with Queen Mary University's estates department and Essex surveyors Gooch and associates to conceive a scheme for the historic Queens building - the hub of the Queen Mary University complex in London's Mile End Road. The concept was put together by our own design department and consisted of Decra's Stratum flush fascia cubicle range in various glossy solid colours, together with a series of local images - encapsulated with melamine for the duct panels. Decra formed the vanity units and integral basins from Durat recyclable material and a new wave effect solid grade laminate in pearl white adorns the walls. Users of the new facilities have described the washrooms as "hotel standard". Contact Decra for details.
