

## Decra Streamline cubicle system unveiled in the new media studies building at Goldsmiths University.

Architects Stride Treglown of Bristol along with m/c Willmott Dixon chose the Decra Streamline cubicle range with elliptical aluminium pilasters combined with durable solid grade laminate for Goldsmiths new DMC building at the New Cross Gate campus. Hard wearing solid grade has been used for all panel components in plain grey for the doors and duct panels and orange and yellow for partition panels on the various floors.

Vanity units take the form of Decra's Levada trough in Corian with sloped solid grade laminate under panels and post formed sgl tops with semi recessed basins. Streamline forms part of the Architectura collection of innovative washrooms contact Decra for more details.
