

Earlham primary school Forest Gate aluminium pilasters, multi colour doors with Perspex over panels

Rear duct panels and door reverse panels are faced with woodland theme images for the ducts and iconic London images for doors - melamine protected as Formica laminates

Breathtaking washrooms by Decra at Earlham primary school in Forest Gate East London from the Loo-ART range of w/c cubicles

Cubicle innovators - Decra worked closely with architects PCA in Sheffield to create this forest and London theme concept for this primary school near Stratford. PCA and Essex surveying firm Cooch and Assoc approached Decra with an outline brief to use digital imagery for aspects of the cubicle panels. Decra set about taking a series of high resolution images over a 3 - 4 month period to assemble sufficient images to create this collage of woodland and iconic London scenes. Rear duct panels have a spring (Bluebell wood) and a winter wood appearance and these are contrasted with multi colour door facings and the London images for the door reverse. This approach saved the project several hundred GBP over sourcing such imagery from image libraries such as Getty images. With CNC cut laminate fretwork above the cubicles the end result is a visual feast. *Ends*
