

Loos in monochrome from Decra's Symetria collection. !!

Building owner Land Securities worked in close liaison with Decra for this washroom upgrade at Harbour Exchange in London's Canary Wharf.

Discreet satin anodise finished aluminium pilasters are combined with dark grey high pressure laminate composite panels for the cubicle doors along with durable satin anodised ironmongery.

The cubicle structure is taken to a height of circa 2100mm to provide a more contemporary appearance and a matching post formed laminate vanity top and light pelmet completes this elegant upgrade.

Symetria forms part of the Decra Architectura range of washroom cubicles and associated products. Contact the Decra sales team for more information.
