## Globe Primary School Tower Hamlets Wigli Junior cubicles

Contractor Bolt & Heeks chose the Decra **Wigli Junior** cubicle system for upgrade works to the washrooms at Globe Primary School - just off Roman Road in London.

Durable 12mm solid grade laminate has been used for all panel components with shaped doors and pilasters which form the distinctive design of the **Wigli** range.

Wall mounted china basins and colourful tile splash backs complement the Decra Buttercup/Cappuccino colour combination for the cubicles and satin anodised cubicle hardware maintains the robustness of the system.

**Wigli** is available in 2 height configurations to suit different age groups as well as standard height for adults.

Decra are chain of custody accredited and can provide a fully PEFC compliant specification for the **Wigli** range for BREEAM considerations.

Contact the Decra sales department for more details.
