

Cascade and Reflex...changing room lockers

Decra **Cascade** and **Reflex** locker systems offer solutions for both wet and dry areas in sports arenas, leisure centres, gymnasias and swimming pools.

Cascade uses 13mm solid grade or 'compact' laminate panels which are immensely durable and unaffected by humidity, to provide the ideal solution for wet areas. With quality ASSA fittings and the option of key or coin operated locks, Cascade is available in a wide variety of colours including those on this data sheet.

Reflex is comprised of high-pressure laminate faced panels which are eminently suitable for dry areas and is extremely popular in offices requiring staff locker facilities. As with Cascade, a wide range of colour, lock and fitting options are available

Both locker systems are available in plinth, floor or bench mounted formats with wall and floor mounted extra benching available in a variety of styles.

Contact Decra for more details and additional colour options.
